THE HYACINTH.

DIRECTIONS FOR CULTURE.

POT CULTURE—Plant the bulbs in rich garden mould, mixed with one-third sand, leaving only the top of bulb exposed. Choice Named Varieties should be used for this special purpose, as they will produce larger spikes of bloom and more brilliant shades of color. Water freely, and place the pot in a dark, cool cellar (away from frost) for six or seven weeks, to allow a vigorous growth of roots. They should then be removed to a light, warm room or conservatory, which will force them to bloom in two or three weeks' time. A continuous display of bloom may be had during the entire winter by bringing in a few pots at intervals of two or three weeks apart. Six or seven inch pots are the most useful sizes.

GLASS CULTURE.—For this purpose single Hyacinths are preferable, they flower more freely, earlier, and produce finer colors. Glasses can also be used for ornamental and decorative purposes in the parlor and sitting-room, and may be changed around whenever needed, with very little inconvenience. Place the bulb in the glass, allowing the water to come as close to the roots as possible without touching. Then put away in a dark, cool closet till the roots have made a growth of from five to six inches deep, when they should be removed to a light, warm room. As the water evaporates, fill up as before, and change every two weeks. A small piece of charcoal in the water is beneficial.

OPEN-GROUND CULTURE.—For a good effect, the bulbs should be planted in rows or designs, and selected from our Separate Varieties, so as to show the combinations of color, which is a great improvement over mixed beds. Plant in October, six inches apart each way, and five inches deep, using rich soil, well manured. Care must be taken not to press the earth too firmly around the bulbs, so as to allow free drainage. At the approach of freezing weather, cover to the depth of four or five inches with straw or litter, removing same early in the spring.

CHOICE NAMED

...HYACINTHS

Single Hyacinth.

FOR POTS AND GLASSES.

WE have exercised **Special Care** in compiling the following list of Choice Named Double and Single Hyacinths. The selection comprises only those bearing perfectly formed flowers of the clearest and brightest colors that lend beauty to either room or conservatory. Very little care need be exercised to bring these beautiful flowers to perfection.

If a selection is made of the colors as below, a succession of bloom is also obtained; these varieties flower with very little intervention.

In purchasing these Selected Named Bulbs, the customer gets the finest spikes of perfect blooms that cannot be obtained from a common grade of mixed Hyacinths.

For pot or glass culture, the Single kinds will be found to excel the Double in profusion of flower.

SELECTED HYACINTHS FOR BEDDING AND FORCING.

We desire to call the attention of our customers to this **SPECIAL LINE** of Single and Double Hyacinths. Mixed in separate colors. They are used extensively in large private places or estates, and in parks for massing in borders and designs. These fine Hyacinths are not a common grade generally sold as "Mixed Hyacinths," i. e., but are a beautiful selection of the finest sorts, all attaining about the same height and coming into flower at the same time. For winter effect they are unrivaled.

Roman Hyacinths.

EARLY WHITE FRENCH ROMAN HYACINTHS.

These are now extensively used for forcing, and are extremely desirable for cutting. Each bulb will throw up from three to four spikes of very fragrant, pure white flowers, smaller than the ordinary Dutch Hyacinth, and more admired on account of their delicate and graceful appearance. Three or four bulbs may be planted in a six-inch pot, using good, rich garden soil for potting.

SINGLE DARK ROSE ROMANS.

This pretty form of Hyacinth much resembles the well-known **White Roman Hyacinths,** except in color. They come into blossom about ten days later, taking the place of many of the early flowering bulbs long past bloom. Their delicate shades of color form a pleasing contrast when placed among other flowers and plants.

Price, 50c. per doz.; $2.50 per 100.

SINGLE LIGHT BLUE ROMANS.

Delicate, semi-double flowers on stiff stalks, of a pale blue color, very fragrant. Keep a long time when cut and placed in water. Used for forcing and table decoration.

Price, 50c. per doz.; $2.50 per 100.

DOUBLE ROSE PINK ROMANS.

This form of the Hyacinth is similar in appearance to the Single Roman, excepting in the flower, which is a very distinct double, exceedingly pretty and effective: stands a long time in flower.

Price, 50c. per doz.; $2.50 per 100.

MINIATURE OR DUTCH ROMAN HYACINTHS.

PAN HYACINTHS.

Bulbs under this heading are much smaller than the ordinary Dutch Hyacinths, and are extensively used for forcing. They are more attractive than the French Romans, and when properly forced throw very fine spikes of bloom. They have proved perfectly hardy slightly protected, and are fine for cutting purposes.

Pure White. **Pink.** **Light Blue.**
Tinted White. **Crimson.** **Dark Blue.**
Mixed Colors.

Price, 60c. per doz.; $4.00 per 100.

ITALIAN HYACINTHS.

These, like the Roman Hyacinths, are grown largely for cutting. Flowers single, graceful and fragrant. Hardier than the Romans, and may be planted outside in the fall for early spring cutting.

	Each.	Per Doz.	Per 100
Single White Italian	$0 08	$0 60	$3 00

MISCELLANEOUS HYACINTHS.

Single Hyacinths.

MUSK HYACINTHS.

A small hyacinth of purplish color, emitting, when in flower, a strong musky odor.

Price, 15c. each; $1.00 per doz.

FEATHERED HYACINTHS.

In this variety the spikes are 10 inches high, producing feathery-like flowers, which are useful for cutting.

Price, 5c. each; 30c. per doz.; $2.00 per 100.

BLUE GRAPE HYACINTHS.

A variety producing flowering spikes about 8 inches high; with small round bells, so arranged as to resemble a bunch of grapes.

Price, 5c. each; 25c. per doz.; $1.50 per 100.

HYACINTHUS CANDICANS.

Cape Hyacinth.

A beautiful hardy plant, with flower stems 3 to 4 feet high, bearing from 20 to 30 large, pure white, drooping flowers.

Price, 5c. each; 50c. per doz.; $3.00 per 100.

NAMED HYACINTHS.

SECOND SIZE BULBS.

For customers not wishing to purchase the first size named bulbs, the following sorts have proven to be the very best. They produce well-shaped, full and compact spikes. It pays well to plant only the named sorts, as they are far superior to the regular separate color quality, which we recommend for outside planting.

Price, $1.25 per doz.; $8.50 per 100; $80.00 per 1000.

Grape Hyacinths.

EARLY SINGLE TULIPS.

THE form and beauty of the Tulip have been improved, until now almost every shade of color is found in them, including the most delicate and gorgeous hues.

Being perfectly hardy, their ease of culture, combined with beauty of form and gorgeous co'oring, renders them the most popular bulbs grown for spring bedding, as well as for winter flowering in the greenhouse and winter garden.

For planting in the open ground, October and November are the best months; the bulbs should be planted from 5 to 6 inches apart, and from 3 to 4 inches deep.

When grown in pots, they should be potted from 3 to 5 in a pot, the soil and treatment being the same as for Hyacinths.

The figures indicating the average height are given before each variety, to aid selection for beds.

SINGLE MIXED TULIPS.

The Tulip is one of the oldest spring favorities, and when planted out 'oors in beds or borders, it is unrivaled for its brilliant effect. For outdoor planting, bulbs should be selected from our choice varieties of separate colors, which bloom about the same time, care being taken in selecting same, so as to get them as near the same height as possible, as to have the bed uniform. For forcing, Single Tulips are considered the best, Duc Van Thol varieties being the favorities, as they flower earlier on account of their dwarf habit.

This mixture contains an elegant assortment of all the colors. Price 20c. per doz · $1.25 per 100; $10.00 per 1000.

EARLY DOUBLE TULIPS.

THE earlier varieties of this class of tulips are admirably adapted for forcing. Many of the other varieties make a fine display when grown in pots, but they require to be forced slowly. The later kinds are very effective for bedding, producing a dense mass of gorgeous colors, which remain in bloom a long time.

DOUBLE MIXED TULIPS.

Double Tulips are very effective, especially when planted in separate colors, such as scarlet, white, and yellow. A most brilliant display can be had by planting them in square or diamond shape beds, and we shall be pleased to name the varieties most suitable for this purpose if so desired. Double Tulips remain longer in bloom than the single varieties, therefore should not be planted together.

A fine assortment of mixed colors for outdoor culture. Price, 25c. per doz.; $1.50 per 100; $12.00 per 1000.

CHINESE SACRED LILY.

Chinese New Year's Lily (Oriental Narcissus, or Fairy Flower). This popular variety of Narcissus, which is grown by the Chinese for their New Year's festivals, comes into flower four or five weeks from time of planting. The flowers are white, with yellow cups, produced in bunches of from five to six on each stem. An open dish, half filled with pebbles, is the most suitable and convenient way to grow them, although they will succeed admirably in pots. 10c. ea.; $1.15 per doz.

IRIS KAEMPFERI.—The Garden Orchid.

Iris Germanica.

The varieties of Iris recently introduced from Japan are marvels of beauty—a plant sending up a dozen flower spikes 3 feet, each spike bearing two to three enormous blossoms 7 to 9 inches across—and of the most delicate and beautiful colors—lavender, mauve, sky blue, royal purple, blush, yellow, etc. Such are these new Iris Kæmpferi, the king of hardy perennial plants. When planted in your garden they are for a life time without further care, blooming profusely in June and July. Named varieties, 20c. each; $2.00 per dozen.

IRIS. (Fleur de Lis.)

The Orchid of the Garden.

This magnificent class of flowering bulbs is well adapted for pots or outdoor culture. They are easily cultivated, hardy, and when well established, the bulbs will stand for years.

Snowdrop.

Freesia Refracta Alba.

SNOWDROPS.

(Galanthus Nivalis.)

These beautiful little snow-white flowers, the earliest of all spring-flowering bulbs, are most suitable for planting in margins of beds or borders, and on lawns, where a fine effect may be obtained by dibbling holes into the grass about a foot apart and four inches deep, and planting a bulb in each hole. This method of planting will give a splendid effect in spring.

Single Flowering. 15c. per doz.; $1 per 100; $7 per 1000. **Double Flowering.** 25c. a doz.; $1.75 a 100; $14 a 1000.

THE BERMUDA EASTER LILY.

Lilium Harrisii.

LILIUM HARRISII.

This deservedly popular and beautiful Lily has long, trumpet-shaped flowers, of a delicate waxy **white,** delightfully fragrant and of great substance. The bulbs should be planted in good, rich soil about the end of August and through the months of September and October. Stand in a cold frame, to allow of a strong growth. When plants attain the height of two to three feet, bring into a gentle heat, not exceeding 65 degrees. For succession, plant at intervals of two to three weeks.

For garden effect, some bulbs may be planted in a border facing south, giving protection, in severe winters, with short manure or straw spread lightly over the surface. These bulbs are as free from disease as it is possible to procure them, and the results, from planting, etc., cannot be otherwise than satisfactory.

First Size Bulbs. 5 to 7 inches. Price, 10c. each; $1.15 per doz.; $7.00 per 100.

Extra Size Bulbs. 7 to 9 inches. Price, 25c. each; $2.50 per doz; $15.00 per 100.

LILIUM LONGIFLORUM.

Japan Grown.

The well-known, lovely pure snow white, hardy Garden Lily, bearing a profusion of trumpet-shaped flowers, 6 to 8 inches long. This variety is also valuable for the greenhouse, it being a **good forcer.** Grows to a height of three to four feet on stiff, straight stems, well foliaged. If planted in open ground, will flower in June. Quite hardy.

Mammoth Bulbs. 9 to 10 inches. 25c. each; $2.50 per doz.; $15.00 per 100.

First Size Bulbs. 7 to 9 inches. Price, 15c. each; $1.50 per doz.; $10.00 per 100. Ready about October 1st.

LILIUM CANDIDUM.

One of the most useful and beautiful Hardy Garden Lilies, bearing large bunches of fragrant white flowers, on stems from 3 to 4 feet high. Grows specially fine in the open ground; is also a good forcer for greenhouse work. The blooms, when cut, last a long time if placed in water. A shady nook in the garden is made exceedingly bright by its presence. Quite hardy, needing no protection from frost.

Price, 10c. each; $1.00 per doz.; $7.00 per 100.

Lilium Candidum.

Lilium Auratum.

LILIES.

These varieties of Lilies are perhaps the most popular grown, being very easily cultivated. They commence flowering in June, and keep up a continuous succession of bloom until late in the fall. Their rich varieties of color and stately habit render them very suitable for outdoor planting. They are perfectly hardy, and should be planted in October or November.

FRINGED-LEAVED PÆONIES.

Pæonia Tenuifolia fl. pl. Foliage a bright, lively green, in long, thread-like filaments; giving it the appearance of fringe. Scarlet crimson. A choice variety. Perfectly hardy. 50c. each; $5.00 per doz.

FRAGRANT PÆONIES.

Considering their wonderful vigor and free flowering habit, their season of blooming—being among the latest—we think they cannot be surpassed by any double Pæonies in Europe or America. 50c. each; $5.00 per doz.

Dorchester. Beautiful cream color, tinted pink; very double, finely formed and deliciously fragrant. Plant rather dwarf but very floriferous.

Grandiflora. Bright flesh or pink, fragrant; a vigorous plant, with well formed double flowers.

Perfection. Very tall, vigorous plant, bearing heavy crops of large, exceedingly double flowers, often raised at the centre; light pink, fading to flesh; very sweet, the best of its color.

Rubra Superba. Dark crimson red, very double and finely formed—fragrant. Plant robust and very free flowering. One of the latest. The most valuable Pæony of its color in our collection.

SINGLE HERBACEOUS PÆONIES.

Some of the new single Pæonies are even more beautiful than the double ones, being very delicate; they are most suitable as cut flowers, and generally bloom quite early. Below are some of the best varieties obtainable. 35c. each.

Diana. Deep rose.

Hermes. Rosy pink. **Jupiter.** Cerise.

TREE PÆONIES (Pæonia Arborea).

This beautiful group of shrubs is among the oldest of introduction from Japan, but magnificent new varieties have been added until we have a long list of wonderful forms. They are quite distinct from the herbaceous section, and have shades of color not found in the latter, and when once established, form compact bushes, which, in spring, are covered with gigantic blooms, and form one of the most decorative features of the garden. Like the herbaceous kinds, they enjoy rich soil, and the blooms last longer and come finer when partially sheltered from the hot sun. They are well worth the little trouble entailed in their cultivation. We can offer strong plants of 50 varieties. 75c. each; the collection for $30.00.

HARDY PHLOX.

For hardy clumps of brilliantly colored masses of flowers on the lawn or among shrubbery, Hardy Perennial Phlox takes the very first rank. The great showy heads of bloom are produced in gorgeous profusion, from midsummer until checked by frost. We offer choice named sorts, field-grown plants.

HARDY PHLOX.—Continued.

Queen. Pure white; fine grower and very fine flower.
Richard Wallace. A very fine grower; profuse bloomer, with large heads of cherry-white flowers, with violet centre. Very large flower.
Terre Neuve. A very effective variety, with grayish lilac flowers, centre violet, tinted white.
Bouquet Fleuri. White, carmine eye; large truss.
Alceste.
Hector.
Caran d'Ache. A large flower, of most perfect form, of a rosy carmine color, centre violet, tinged with rose.
Epopee. Immense flowers of a clear violet, marbled with rose, and a bright, fiery centre.
Jules Jouy. A clear lilac rose; large white centre.
Lothair. Rich salmon color, crimson eye; large spreading spike; choice variety.
Premier Minister. Rosy white, centre deep rose; fine.
White Swan. A variety of great merit; immense trusses of large snow-white flowers, with a bright pink centre, and one of the earliest in bloom.
Amœna. Bright pink flowers in dense heads, each held well above the tufted evergreen foliage by a clean, wiry stem. Fine for cutting. 15c.
Carolina. American. Forms a dense, well-branched plant, completely enveloped by its showy heads of bright pink flowers. 15c.
Subulata (Moss Pink). Handsome, moss like, creeping, evergreen foliage, which in early spring is completely hidden by the clouds of deep purplish pink. Fine for bedding or carpeting purposes. 15c. each; $1.25 per doz.; $8.00 per 100.
J. H. Slocum. Large flowers, deep rose pink, with crimson eye. 15c.
Aurora Boreale. Flowers large, in dense panicles. Orange, with purple centre. 20c.

LAWN GRASS SEED.

WEEBER & DON'S
Central Park Lawn Grass.

(WEIGHT, 20 LBS. PER BUSHEL.)

This lawn mixture is composed entirely of the finest quality of fine-leaved dwarf (evergreen) growing grasses, in such proportions as will enable it to withstand the extreme heat of our summer. We give special attention to the RE CLEANING of our grass seeds, removing all obnoxious weeds and foreign substances, thus insuring a perfect and clean lawn. We recommend **four bushels of seed to the acre**; the thicker the seed is sown, the sooner a smooth, velvety lawn will be obtained. One quart of seed will sow 15x20 feet.

Price, per quart, **25c.**; per peck, **$1.25**; per bushel (20 lbs), **$4.50**; per 100 lbs., **$20.00.**

SPECIAL MIXTURE OF

Grasses and Clovers

FOR

HAY AND PERMANENT PASTURE.

MEADOW FESCUE.

The selection of seeds in our mixture, being entirely composed of the true permanent species, are somewhat more expensive than mixtures of seeds which contain a considerable proportion of Rye Grass and Timothy, but it is admitted that the laying down of land to grass with such mixtures as it was customary to use a few years ago has often proved very unsatisfactory, and even when most successful the success has only been attained by the application of expensive manures and after years of waiting; whereas selections of such seeds as are given in this mixture will produce profitable pastures the first year after they have been laid down, and will increase in profitableness year by year if ordinary care be given them.

This special mixture may be sown either in the spring or fall, using **three bushels of seed** to one acre, with an additional **ten pounds of mixed clover, sown** in the **spring.**

Special mixture, per bush. (14 lbs.), $2.50. **Mixed clover,** per lb., 20 cents. Special quotations for large quantities.

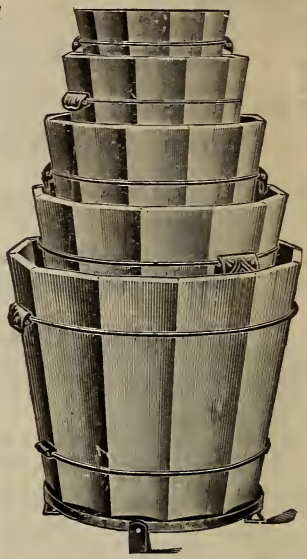
Columbia Plant Tubs.



The Tubs are made of the best cypress timber, which will keep for years without decaying. They have 12 staves, in tapered shape, held together by two heavy steel wires, which are connected with substantial iron handles, and are so arranged that the wire can be tightened or loosened by simply turning nut on handle. The handle itself is so constructed that the Tub can be lifted by hand, and, in case the plants are heavy, sticks can be inserted in handle, thereby allowing all weight to be lifted with perfect ease.

For fumigating plants, to destroy insects in hothouses, hotbeds, etc. In bales of 100 lbs., $1.75; 300 lbs., $4.50.

WEEBER & DON'S
SURE CROP MUSHROOM SPAWN

A FEW DIRECTIONS FOR FORMING MUSHROOM BEDS.

The Mushroom is one of the most profitable crops grown, especially in the vicinity of large cities, where the demand, at all seasons, is far in excess of the supply.

The best time for making mushroom beds is in August and September, as in the fall months the natural heat is sufficient to cause the spawn to germinate freely, and the beds made then ought to bear freely before and up to Christmas. Mushrooms can be grown in sheds, cellars, caves, under benches in greenhouses, and in regular mushroom houses.

In preparing the materials, collect sufficient fresh horse droppings to form the desired size of bed, spreading them out in an airy shed to dry, and turning them frequently. When in a proper state as to dryness, which will soon be learned by experience, make these into a bed from nine inches to one foot thick, beating them firmly together. If the droppings have been properly prepared, gentle fermentation will soon commence, and when the temperature of the bed is from 75° to 80°, with no danger of it rising higher, put in the spawn. This is done by making shallow holes, about nine inches apart, inserting pieces of spawn about the size of a hen's egg, and covering with the dung, pressing this closely about the spawn. It is of the greatest importance that the temperature of the bed should not decline below 75°, nor rise above 80° for a month after spawning. Within a fortnight after putting in the spawn, cover the bed about two inches thick with good mellow, moist soil, making this firm; and if under this a covering one or two inches thick of cow dung, in about the same state as to moisture as the soil, can be afforded, this will cause the bed to last longer, and also to produce a larger crop than if covered with soil only. The most suitable temperature for beds in bearing is 50° to 55°, and as a high temperature causes the Mushrooms to come small, this should be avoided. Watering beds in bearing often causes the small Mushrooms to damp off; therefore, water only when the bed ceases to be productive, and then use the water about the same temperature as the bed.
